Century** European sailing
ships become advanced
enough to reliably
cross oceans.

HOW TECH CAN BRING PEOPLE TOGETHER?

By using different kinds of communication like mobile phones, computer and other useful things for communication.

THE PROS AND CONS

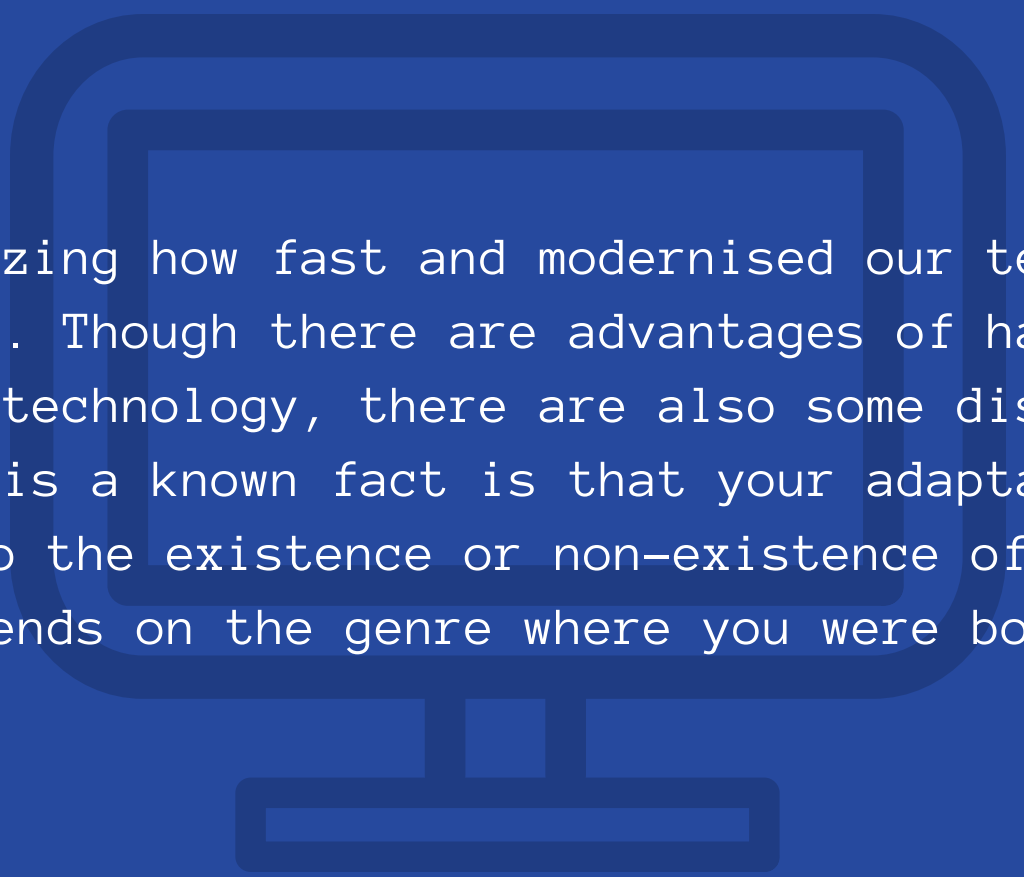

PROS

It helps people to communicate fast, can travel to certain places and can also trade goods all over the world. By the help of tech it became much more comfortable to the society.

CONS

The communication in each family are becoming less because of the daily use of mobile phones and computers that leads to miscommunication. Tech is to be blamed for the negative effects of climate change

O V E R V I E W

It's amazing how fast and modernised our technology changes. Though there are advantages of having a very modern technology, there are also some disadvantages. But what is a known fact is that your adaptation and endurance to the existence or non-existence of technology depends on the genre where you were born.

TECHNOLOGY
IS A USEFUL
SERVANT BUT
A DANGEROUS
MASTER.
